

Office 2016– Excel Basics 05

Video/Class Project #17

Excel Basics 5: Power of PivotTables to Create Reports with Various Calculations & Layouts

Goal in video # 5: Learn more about how we can use PivotTables to create Summary Reports with Different Calculations and Layouts.

- 1) Keyboard to open Create PivotTable dialog box when a single cell is selected in the Proper Date Set = Alt, N, V.
- 2) The reason that a PivotTable is called a “Pivot Table” is because you can drag and drop the fields to either the Rows area or Columns Area in the PivotTable Fields Task Pane to see different views of the report, and you can drag the field you want to make a calculation on, to the Values area.

i.

- 3) If we create a Regional Sales Report with the Region field in Rows area and the Sales field in the Values area, it looks like this:

Date	Region	SalesRep	Sales
10/20/17	West	Gigi	\$620
10/20/17	Northwest	Gigi	\$484
10/20/17	West	Freddy	\$376
10/20/17	Northwest	Freddy	\$1,141
10/20/17	Northwest	Chin	\$725
10/20/17	West	Chin	\$222
10/20/17	West	June	\$1,038
10/21/17	Northwest	Chin	\$154
10/21/17	Northwest	Gigi	\$205
10/21/17	Southwest	Gigi	\$895
10/21/17	West	Chin	\$1,254
10/22/17	Northwest	June	\$596
10/24/17	Southwest	Gigi	\$799
10/24/17	Northwest	Gigi	\$651
10/24/17	West	June	\$1,235
10/24/17	Southwest	Chin	\$684
10/24/17	Northwest	June	\$127
10/24/17	West	June	\$269
10/25/17	Southwest	Chin	\$739
10/25/17	West	Gigi	\$1,201
10/25/17	Northwest	June	\$546
10/25/17	Northwest	Chin	\$162

Region	Sum of Sales
Northwest	\$4,791.00
Southwest	\$3,117.00
West	\$6,215.00
Grand Total	\$14,123.00

The image shows the PivotTable Fields task pane with the following configuration: Region is in the Rows area, and Sum of Sales is in the Values area. The other areas (Filters and Columns) are empty. The 'Defer Layout Update' checkbox is unchecked, and the 'Update' button is visible.

i.

ii. If you drag the "Region" Field from the Row area or Column Area, you would see this report:

	Region			
	Northwest	Southwest	West	Grand Total
Sum of Sales	\$4,791.00	\$3,117.00	\$6,215.00	\$14,123.00

iii. If you now drag the SalesRep Field from the Field List down to the Row Area, you would see this report which shows the sales for each SalesRep in each Region:

Sum of Sales	Region			
SalesRep	Northwest	Southwest	West	Grand Total
June	\$1,269.00		\$2,542.00	\$3,811.00
Chin	\$1,041.00	\$1,423.00	\$1,476.00	\$3,940.00
Freddy	\$1,141.00		\$376.00	\$1,517.00
Gigi	\$1,340.00	\$1,694.00	\$1,821.00	\$4,855.00
Grand Total	\$4,791.00	\$3,117.00	\$6,215.00	\$14,123.00

4) It is important to notice that the essence of a PivotTable is that we are making a calculation with conditions or criteria.

i. In our 1st Report we are adding the sales for a particular Region:

Region	Sum of Sales
Northwest	\$4,791
Southwest	\$3,117
West	\$6,215
Grand Total	\$14,123

1.

Here we are adding Sales with the condition/criteria "Northwest"

Here we are adding Sales with the condition/criteria "Southwest"

Here we are adding Sales with the condition/criteria "West"

ii. In our 2nd report we are adding the sales for each SalesRep in each Region. This means that we have Fields in both Rows area and Columns area and we are adding with two Conditions/Criteria:

In order for the sales amount to be used to get the total, the record for the sale had to have the SalesRep equal to "June" AND the Region had to be equal to "Northwest".

Date	Region	SalesRep	Sales
10/20/17	West	Gigi	\$620
10/20/17	Northwest	Gigi	\$484
10/20/17	West	Freddy	\$376
10/20/17	Northwest	Freddy	\$1,141
10/20/17	Northwest	Chin	\$725
10/20/17	West	Chin	\$222
10/20/17	West	June	\$1,038
10/21/17	Northwest	Chin	\$154
10/21/17	Northwest	Gigi	\$205
10/21/17	Southwest	Gigi	\$895
10/21/17	West	Chin	\$1,254
10/22/17	Northwest	June	\$596
10/24/17	Southwest	Gigi	\$799
10/24/17	Northwest	Gigi	\$651
10/24/17	West	June	\$1,235
10/24/17	Southwest	Chin	\$684
10/24/17	Northwest	June	\$127
10/24/17	West	June	\$269
10/25/17	Southwest	Chin	\$739
10/25/17	West	Gigi	\$1,201
10/25/17	Northwest	June	\$546
10/25/17	Northwest	Chin	\$162

Sum of Sales	Region	SalesRep	Northwest	Southwest	West	Grand Total
	June		\$1,269.00		\$2,542.00	\$3,811.00
	Chin		\$1,041.00	\$1,423.00	\$1,476.00	\$3,940.00
	Freddy		\$1,141.00		\$376.00	\$1,517.00
	Gigi		\$1,340.00	\$1,694.00	\$1,821.00	\$4,855.00
	Grand Total		\$4,791.00	\$3,117.00	\$6,215.00	\$14,123.00

PivotTable Fields

Choose fields to add to report:

Search

Date
 Region
 SalesRep
 Sales

More Tables

Drag fields between areas below:

Filters

Columns
Region

Rows
SalesRep

Values
Sum of Sales

Defer Layout Update Update

Sum of Sales	Region	SalesRep	Northwest	Southwest	West	Grand Total
	June		\$1,269.00		\$2,542.00	\$3,811.00
	Chin		\$1,041.00	\$1,423.00	\$1,476.00	\$3,940.00
	Freddy		\$1,141.00		\$376.00	\$1,517.00
	Gigi		\$1,340.00	\$1,694.00	\$1,821.00	\$4,855.00
	Grand Total		\$4,791.00	\$3,117.00	\$6,215.00	\$14,123.00

The total sales of **\$1269** is adding with the **two** criteria "June" from the SalesRep Field and "Northwest" from the Region Field.

5) Important PivotTable Concepts:

- i. Rows area is where you drop Field Names that are Criteria for calculation in Values area.
- ii. Columns area is where you drop Field Names that are Criteria for calculation in Values area.
- iii. Values area is where you drop Field Names that you want to make a calculation upon.

Columns area is where you drop Field Names that are Criteria for calculation in Values area

13	Date	Region	SalesRep	Sales
14	10/20/17	West	Gigi	\$620
15	10/20/17	Northwest	Gigi	\$484
16	10/20/17	West	Freddy	\$376
17	10/20/17	Northwest	Freddy	\$1,141
18	10/20/17	Northwest	Chin	\$725
19	10/20/17	West	Chin	\$222
20	10/20/17	West	June	\$1,038
21	10/21/17	Northwest	Chin	\$154
22	10/21/17	Northwest	Gigi	\$205
23	10/21/17	Southwest	Gigi	\$895
24	10/21/17	West	Chin	\$1,254
25	10/22/17	Northwest	June	\$596
26	10/24/17	Southwest	Gigi	\$799
27	10/24/17	Northwest	Gigi	\$651
28	10/24/17	West	June	\$1,235
29	10/24/17	Southwest	Chin	\$684
30	10/24/17	Northwest	June	\$127
31	10/24/17	West	June	\$269
32	10/25/17	Southwest	Chin	\$739
33	10/25/17	West	Gigi	\$1,201
34	10/25/17	Northwest	June	\$546
35	10/25/17	Northwest	Chin	\$162

Sum of Sales		Region			
SalesRep	Northwest	Southwest	West	Grand Total	
June	\$1,269.00		\$2,542.00	\$3,811.00	
Chin	\$1,041.00	\$1,423.00	\$1,476.00	\$3,940.00	
Freddy	\$1,141.00		\$376.00	\$1,517.00	
Gigi	\$1,340.00	\$1,694.00	\$1,821.00	\$4,855.00	
Grand Total	\$4,791.00	\$3,117.00	\$6,215.00	\$14,123.00	

Rows area is where you drop Field Names that are Criteria for calculation in Values area

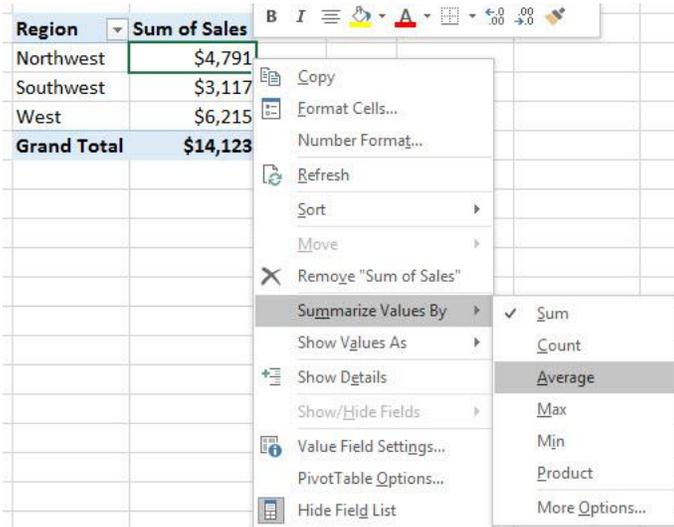

Values area is where you drop Field Names that you want to make a calculation upon

6) When there are Fields in both the Rows and Columns area of a PivotTable, this report is sometimes called a **Cross Tabulated Report** because the intersecting calculation has a Rows area condition and a Columns area condition, like it is a “cross”:

Sum of Sales	Region			
SalesRep	Northwest	Southwest	West	Grand Total
June	\$1,269		\$2,542	\$3,811
Chin	\$1,041	\$1,423	\$1,476	\$3,940
Freddy	\$1,141		\$376	\$1,517
Gigi	\$1,340	\$1,694	\$1,821	\$4,855
Grand Total	\$4,791	\$3,117	\$6,215	\$14,123

7) We can change the summary calculation from “Sum” to a different calculation, like “Average”.

i. With a cell selected in the Values area of the PivotTable, you can right-click and point to “Summarize Values By” and then select a calculations such as “Average”, like:

ii. This report shows the average sale made in each Region. This is an example of the average calculation being made with a single condition.

Region	Average of Sales
Northwest	\$479
Southwest	\$779
West	\$777
Grand Total	\$642

Here we are averaging Sales with the condition/criteria “Northwest”

Here we are averaging Sales with the condition/criteria “Southwest”

Here we are averaging Sales with the condition/criteria “West”

8) We can drag Number fields or Text fields to values area:

- i. If we drag a Number Field, the default calculation will be to SUM, like here where our goal is to add the Sales for Each Region and we dropped the Sales field to the Values area:

Region	Sum of Sales
Northwest	\$4,791
Southwest	\$3,117
West	\$6,215
Grand Total	\$14,123

PivotTable Fields

Choose fields to add to report: [Settings] [Search]

- Date
- Region
- SalesRep
- Sales

More Tables...

Drag fields between areas below:

Filters	Columns
Rows	Σ Values
Region	Sum of Sales

Defer Layout Update [Update]

1.

- ii. If we drag a Text Field, the default calculation will be to COUNTA, like here where our goal is to count how many sales we had in each Region and we dropped the Region field to the Values area:

Region	Count of Region
Northwest	10
Southwest	4
West	8
Grand Total	22

PivotTable Fields

Choose fields to add to report: [Settings] [Search]

- Date
- Region
- SalesRep
- Sales

More Tables...

Drag fields between areas below:

Filters	Columns
Rows	Σ Values
Region	Count of Region

Defer Layout Update [Update]

1.

9) It is just as easy to make a PivotTable from a small Proper Data Set as it is to make a PivotTable from a large Proper Data Set.

i. Here is what our Proper Data Set looks like (some rows are hidden):

	A	B	C	D	E
1	Date	Product	Sales Rep	Region	Sales
2	6/13/2017	Quad	Fran	South	200.27
3	2/22/2017	Yanaki	Kiki	Northwest	243.99
4	8/4/2017	Quad	Fran	East	1817.8
5	10/13/2017	Yanaki	Fran	West	204.3
6	11/18/2018	Majestic Beaut	Kiki	West	2063.08
13675	9/5/2018	Yanaki	Fran	Northwest	1154.01
13676	9/2/2017	Majestic Beaut	Tyrone	East	368.13
13677	7/19/2017	Bellen	Fran	South	522.8

- ii. The keyboard to jump to the bottom of a column (jump to last row before an empty cell) = Ctrl + Down Arrow.
- iii. The keyboard to jump to cell A1 = Ctrl + Home.

10) Format PivotTable with the PivotTable Tools Design Ribbon Tab "PivotTable Styles" More button, like in this picture:

The screenshot shows the Excel interface with the PivotTable Tools Design ribbon active. The PivotTable Styles gallery is visible, and a red circle highlights the 'More' button (a small square with a downward arrow) in the bottom right corner of the gallery. Below the ribbon, a PivotTable is displayed with the following data:

Sum of Sales	Column Labels	Northwest	South	West	Grand Total
Row Labels	East				
Aspen		\$241,599.00	\$250,896.98	\$228,567.83	\$938,901.96
Bellen		\$270,388.31	\$252,095.16	\$231,234.26	\$1,036,923.41
Carlota		\$230,834.88	\$232,762.97	\$246,633.45	\$963,358.96

11) PivotTable Slicers

- i. Slicers allow us to add a condition to all the calculations in the PivotTable.
- ii. To insert a Slicer into a PivotTable, click in one cell in the PivotTable Report, then go to the PivotTable Tools Analyze Ribbon Tab, then in the Filter Group, click the Insert Slicer button, like in this picture:

The screenshot shows the Excel interface with the PivotTable Tools Analyze ribbon active. The 'Insert Slicer' button is highlighted in the Filter group. A red arrow points to this button. A tooltip for 'Insert Slicer' is visible, stating: "Use a slicer to filter data visually. Slicers make it faster and easier to filter Tables, PivotTables, PivotCharts, and cube functions." Below the ribbon, a PivotTable is displayed with the following data:

Sum of Sales	Region	Northwest	South	West	Grand Total	
Product	East					
Aspen		\$241,599.00	\$250,896.98	\$228,567.83	\$938,901.96	
Bellen		\$270,388.31	\$252,095.16	\$231,234.26	\$1,036,923.41	
Carlota		\$230,834.88	\$232,762.97	\$246,633.45	\$963,358.96	
Majestic Beaut		\$254,395.42	\$192,929.50	\$253,568.20	\$931,947.95	
Quad		\$514,954.28	\$515,297.14	\$453,621.59	\$2,038,155.16	
Yanaki		\$482,779.47	\$498,191.88	\$520,873.91	\$2,024,625.29	
Grand Total		\$1,994,951.36	\$1,942,173.63	\$2,062,288.50	\$1,934,499.24	\$7,933,912.73

- iii. In the Insert Slicer Dialog box we can check the field that we would like, like in this picture:

- iv. If we want to add formatting to the Slicer, with the Slicer selected, we can use the Slicer Tools Options Ribbon Tab, like in this picture:

12) Summary of how to create PivotTable:

- i. Click in one cell in Proper Data Set
- ii. Insert Ribbon Tab, Tables group, PivotTable button.
- iii. From Field List, drag field name to Rows area or Columns area. These are the conditions/criteria for the calculation in the Values area of the PivotTable.
- iv. From Field List drag the field you would like to make a calculation on to values area.
- v. With a cell selected in the PivotTable, click on PivotTable Tools Design Ribbon Tab, go to the Layout group, click drop-down for Report Layout and then click on "Show in Tabular Form".
- vi. To add Number Formatting to the Values area of the PivotTable, click in one cell in the Values area of the PivotTable, Right-click the cell and click on "Number Format...", then in the Number Formatting dialog box select the Number Formatting that you would like and then click OK.
- vii. If you want to change the summary calculation in the Values area, right-click the Values area in the PivotTable Report, point to "Summarize Values By" and then select a calculations such as "Average".

13) Making Calculations with Conditions or Criteria

- i. "Calculations with Conditions or Criteria " is an important concept in business because most reports contain calculations with conditions or criteria
- ii. Example of adding sales with one condition using SUMIFS. Here we are adding the sales for "Northwest":

13	Date	Region	SalesRep	Sales	Region	Total
14	10/20/17	West	Gigi	\$620	Northwest	=SUMIFS(\$D\$14:\$D\$35,\$B\$14:\$B\$35,F14)
15	10/20/17	Northwest	Gigi	\$484	Southwest	
16	10/20/17	West	Freddy	\$376	West	

- 1.
- iii. Example of adding sales with one condition using PivotTable. The selected cell shows adding the sales for "Northwest":

13	Date	Region	SalesRep	Sales
14	10/20/17	West	Gigi	\$620
15	10/20/17	Northwest	Gigi	\$484
16	10/20/17	West	Freddy	\$376
17	10/20/17	Northwest	Freddy	\$1,141
18	10/20/17	Northwest	Chin	\$725
19	10/20/17	West	Chin	\$222
20	10/20/17	West	June	\$1,038
21	10/21/17	Northwest	Chin	\$154
22	10/21/17	Northwest	Gigi	\$205
23	10/21/17	Southwest	Gigi	\$895
24	10/21/17	West	Chin	\$1,254
25	10/22/17	Northwest	June	\$596
26	10/24/17	Southwest	Gigi	\$799
27	10/24/17	Northwest	Gigi	\$651
28	10/24/17	West	June	\$1,235
29	10/24/17	Southwest	Chin	\$684
30	10/24/17	Northwest	June	\$127
31	10/24/17	West	June	\$269

Region	Sum of Sales
Northwest	\$4,791
Southwest	\$3,117
West	\$6,215
Grand Total	\$14,123

Average of Sales

- v. Example of adding sales with two condition / criteria using PivotTable. The interesting cell is an example of adding sales that were by the SalesRep "Chin" in the Region "Northwest":

	Sum of Sales	Region			
SalesRep		Northwest	Southwest	West	Grand Total
June	\$1,269			\$2,542	\$3,811
Chin	\$1,041		\$1,423	\$1,476	\$3,940
Freddy	\$1,141			\$376	\$1,517
Gigi	\$1,340		\$1,694	\$1,821	\$4,855
Grand Total	\$4,791		\$3,117	\$6,215	\$14,123

1.

New Keyboard Shortcut:

- 1) Keyboard to open Create PivotTable dialog box when a single cell is selected in the Proper Date Set = Alt, N, V.
- 2) Keyboard to put PivotTable on New Sheet when a single cell is selected in the Proper Date Set = Alt, N, V, Enter.
- 3) The keyboard to jump to the bottom of a column (jump to last row before an empty cell) = Ctrl + Down Arrow.
- 4) The keyboard to jump to cell A1 = Ctrl + Home.
